

AI – ENABLED BUSINESS INTELLIGENCE

Week 6 — AI-Assisted Insights & Storytelling

1. Overview of the Week

This week is the first full week where you apply AI tools to your BI work. You will use ChatGPT, Gemini, or Claude to generate insight prompts from your Week 4 dashboard data, evaluate AI outputs critically against the actual numbers, build a 5-slide Insight Deck using the Problem → Data → Finding → So What → Recommendation framework, and record a 3-minute walkthrough video. The key lesson here: AI accelerates your analysis but never replaces your judgement — every AI-generated claim must be verified.

2. What You Will Do This Week

- **Generate 5 AI Insight Prompts** from your Week 4 dashboard dataset:
 - Open ChatGPT, Gemini, or Claude.
 - Give the AI a brief data context (what the dataset is, what columns it has). For privacy, share a small sample or schema — not the full dataset.
 - Ask it to suggest 5 analytical questions it could help answer. These are your "insight prompts".
 - Save both the prompt and the 5 suggested questions.
- **Validate AI Output:**
 - For each of the 5 suggested questions, run the actual analysis yourself on the real data (in Python or Sheets).
 - Note which questions the AI suggested that were actually answerable with your data (some will be off-target).
 - Mark each question as: Accurate / Partially Accurate / Inaccurate based on the AI's framing.
- **Define 3 Concrete Business Questions** from your dashboard. These should be the most decision-relevant questions. For each:
 - Use AI to draft a narrative paragraph interpreting the data for that question.
 - **Fact-check every claim in the narrative against the actual data.** Edit any AI claim that is wrong, vague, or overreaching.
 - Note in a short log which AI claims you had to edit.
- **Build 5-slide Insight Deck in Canva, Google Slides, or PowerPoint:**
 - **Slide 1 — Problem:** What business question are we answering? Who cares? (20–40 words on slide)
 - **Slide 2 — Data:** What data was used? Source, size, time period. (20–40 words + maybe one stat card)

AI – ENABLED BUSINESS INTELLIGENCE

- **Slide 3 — Finding:** The single most important finding, with 1 chart. Keep copy minimal.
- **Slide 4 — So What:** Why does this finding matter for the business? (30–50 words)
- **Slide 5 — Recommendation:** What should the decision-maker do next? 1–3 actionable steps.
- Use your brand/professional design: consistent colour scheme, limit fonts to 2, no clutter.
- **Record 3-minute walkthrough video** of the Insight Deck:
 - Use Loom (loom.com — free) or OS screen recorder.
 - Screen-share the Insight Deck, speak through each slide (≈35 seconds per slide).
 - Upload as YouTube Unlisted or Loom shareable link.

3. Learning Outcomes for the Week

Week Outcome	Mapped to CLO
Use AI tools to generate analytical insight prompts from a dataset	CLO-5
Critically validate AI-generated claims against actual data	CLO-5, CLO-6
Build a structured Insight Deck using the Problem → Data → Finding → So What → Recommendation framework	CLO-5, CLO-7
Record and deliver a clear walkthrough of an Insight Deck	CLO-7

4. Resources

4.1 YouTube Videos

#	Title / Content	Channel & Link
1	How to Use ChatGPT for Data Analysis	Luke Barousse — https://www.youtube.com/watch?v=gJ0O2elt-IE
2	Gemini for Data Analysis — Full Tutorial	Anna McPhee — https://www.youtube.com/watch?v=K8-KnVxQz4M
3	Claude AI for Business Analysts	AI Advantage — https://www.youtube.com/watch?v=uN0nBY-D4mY
4	Data Storytelling — The Art and Science	Storytelling with Data — https://www.youtube.com/watch?v=8NYm7QFKwpM
5	How to Build an Insight Deck	McKinsey — https://www.youtube.com/watch?v=ZkU9qjDCnHI

AI – ENABLED BUSINESS INTELLIGENCE

6	Prompt Engineering for Data Analysts	Ken Jee — https://www.youtube.com/watch?v=UKz79a_IuEc
7	How to Write an Executive Summary	HBR — https://www.youtube.com/watch?v=UtdyKa2sLBE

5. Deliverables

Deliverable 1: Insight Deck (5 slides, PDF)

- Exactly 5 slides (not more, not less).
- Slide 1 — Problem; Slide 2 — Data; Slide 3 — Finding (with 1 chart); Slide 4 — So What; Slide 5 — Recommendation.
- Clean design: consistent colour scheme, 2 fonts maximum, minimal clutter.
- Export from Canva/Google Slides/PowerPoint as PDF.
- File name: W6_InsightDeck_[InternID].pdf

Deliverable 2: AI Validation Log (appendix)

- 1–2 pages.
- Contains:
 - The 5 AI-generated insight prompts.
 - Your evaluation of each (Accurate / Partially Accurate / Inaccurate + 1-line reason).
 - 2–3 examples of specific AI claims you had to edit when drafting narratives, with before/after.
- Can be appended to the Insight Deck PDF as additional pages, or submitted separately.
- File name (if separate): W6_AIValidationLog_[InternID].pdf

Deliverable 3: 3-minute Walkthrough Video

- Duration: 2:30 to 3:30 minutes.
- Format: screen share of the Insight Deck with your voice narration.
- Upload: YouTube Unlisted or Loom shareable link (sharing set to "Anyone with link can view").
- Submit the link in the TBI-GEU LMS Assignment text/link field.

AI – ENABLED BUSINESS INTELLIGENCE

6. Submission Instruction

- All submissions must be completed through the designated Google Form shared for Week 6 deliverables. **Submissions through any other medium will not be considered.**
- In case of multiple files, it is mandatory to **compress all files into a single .zip folder** before uploading. Only one consolidated file should be submitted in the file upload section of the form.
- If an intern is unable to meet the submission deadline due to a genuine emergency, a formal email must be sent to **internbti@geu.ac.in** by Sunday of the same week. Requests without valid justification or **submissions after the deadline** will not be considered.
